## INTRODUCTION

Marble Classic specialises in the design, supply and installation of all natural stone material such as marble, granite, travertine, limestone and sandstone.

Our manufacturing process is entrusted to fully computerised equipment. This highly sophisticated plant machinery adopts avant-garde technologies thereby eliminating any possibility of human error when executing complex profiles requiring consistency, quality and precision.

However, our success on projects cannot be achieved with state-of-the-art machinery alone: our installation teams and factory workforce are specialised and experienced in all aspects of natural stone work.

Our highly qualified in-house Technical Professionals provide advice on subjects such as mechanical fixing applications, curtain walling, various natural stone installation techniques, manufacture and design.

Management operate hands-on, prioritising the quality of products manufactured, ensuring timeous completion on projects and liaising with industry professionals and clients, continually striving to achieve exceptional results at all times.

Furthermore, our mission statement is focused on service, which forms the basis of the Marble Classic strategy that is firmly rooted and upheld by Management over years of experience in the field. It is with this spirit of passion and dedication that we are motivated to constantly achieve higher levels of quality.

We have equipped our stores with an extensive selection of marble and granite available in a wide range of colours so as to meet the exhaustive requirements of the commercial, industrial and domestic environments.

Marble Classic would, at all times, welcome the opportunity of accepting tenders for the design, manufacture and installation of marble and granite. Our large portfolio of prestigious projects are positive proof of our integrity and expertise and we strongly believe that any tender undertaken shall be executed with complete competence, as we pride ourselves on accepting all projects large and small.
